# Bug Report - Paylocity Benefits Dashboard

**Feature Under Test:** Paylocity Benefits Dashboard
**In Scope:** Paylocity Benefits Dashboard, Paylocity Benefits Dashboard API
**Created By:** Bryan Lee
**Creation Date:** 05/29/2021

# Bugs/Defects

**Bug ID:** BID_PBD_1
**Bug Title:** Lack of Error Handling in UI
**Priority:** Low
**Environment:** https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits

**Description**:
As an Employer using the Paylocity Benefits Dashboard, when I enter an invalid character for the number of dependents and click "Add", I receive no error handling explaining why my action does not process.

Steps to Reproduce-
1. Open https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits
2. Click "Add Employee"
3. Attempt to create an Employee with an invalid character (Special or Alphabetical) in the "Dependants" (sic) section.
4. Click "Add"

Actual Result: My request is not processed.

Expected Result: I should also receive an error message explaining why my request does not process.

**Bug ID:** BID_PBD_2
**Bug Title:** UI Data Table Times Out
**Priority:** High
**Environment:** https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits
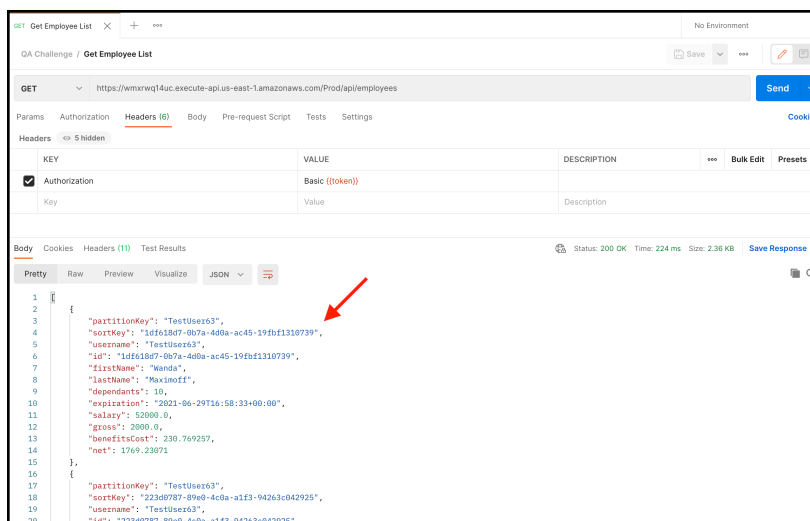

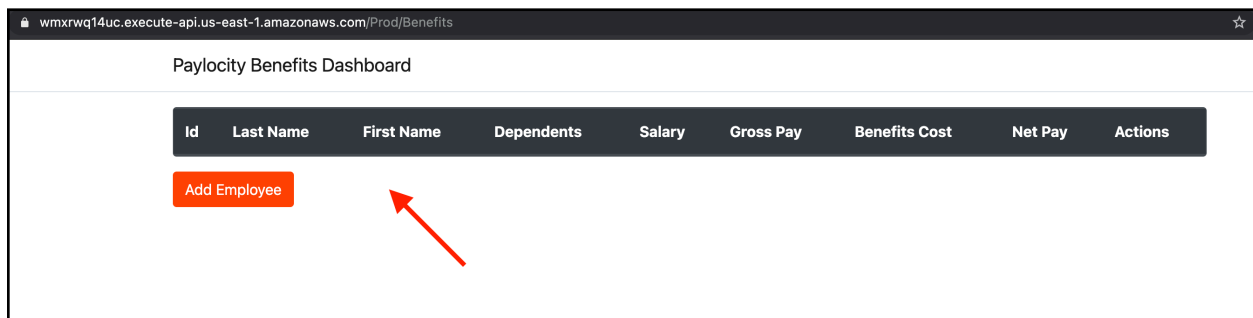

**Description**:
As an Employer using the Paylocity Benefits Dashboard, after a certain amount of time the connection to the Data Table appears to time out. When I refresh the page, the data in the table disappears, despite it still being visible in the API.

Steps to Reproduce-
1. Open https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits
2. Wait 10 minutes
3. Refresh page

Actual Result: The data disappears from the data table.

Expected Result: The Employee list data should persist through the refresh.

**Bug ID:** BID_PBD_3
**Bug Title:** Able to enter Invalid Characters for First and Last Name
**Priority:** Medium
**Environment:** https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits

**Description**:
As an Employer using the Paylocity Benefits Dashboard, when I add an Employee, I am able to enter invalid characters (Special or Numerical) for both First and Last Name fields.

Steps to Reproduce-
1. Open https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits
2. Click "Add Employee"
3. Create an Employee with an invalid character (Special or Numerical) in the "First Name" or "Last Name" fields
4. Click "Add"

Actual Result: The Employee is added with invalid characters in their name fields.

Expected Result: Error handling should stop invalid characters from being entered for these name fields.

**Bug ID:** BID_PBD_4
**Bug Title:** Able to enter Invalid Characters for First and Last Name in API
**Priority:** Medium
**Environment:** Paylocity Benefits Dashboard API

**Description**:
As a user using either the "Add Employee" or "Update Employee" Paylocity Benefits Dashboard API functionality, I am able I am able to enter invalid characters (Special or Numerical) for both First and Last Name fields.

Steps to Reproduce-
1. Access Paylocity Benefits Dashboard API
2. Using either the PUT or POST functionality, update or add an employees' firstName or lastName fields to include invalid characters (Special or Numerical).
3. Verify that invalid characters are accepted and used in the UI.

Actual Result: The Employee is added or updated with invalid characters in their name fields.

Expected Result: Error handling should stop invalid characters from being used in PUT or POST requests for these name fields.

**Bug ID:** BID_PBD_5
**Bug Title:** Add Employee Modal Typo - "Dependants"
**Priority:** Low
**Environment:** https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits

**Description**:
As an Employer using the Paylocity Benefits Dashboard, when I attempt to Add an Employee, I can see that the word "Dependents" is misspelled in the "Add Employee" modal.

Steps to Reproduce-
1. Open https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits
2. Click "Add Employee"
3. Verify misspelling of "Dependents"

Actual Result: The word is spelled "Dependants"

Expected Result: The word should be correctly spelled as "Dependents"
